

ENGINEERING CALCULATIONS AND WET STAMP

American Walk In Coolers upon request offers P.E. approved stamped calculated engineering packet to ensure code compliance in all 50 States.

- Structural design of premanufactured insulated panels and their supporting members.
 - This includes typical gravity steel and/or moment frame steel if required.
- Walk-in anchorage to the foundation system.
 - This includes ensuring the adequacy of anchorage called out in details, or providing alternative anchoring methods to ensure structural integrity of walk-in.
- Deliverables include:
 - PE stamped calculation packet which includes all necessary calculations to ensure code compliance.
 - PE stamped shop drawings. Shop drawings are provided by American Walk In Coolers. The customer is responsible for addressing markups (redlines) from P.E. Engineers to meet the code design requirements. We can implement minor changes to PDF's if required.
- Fees include any remedial design change requirements due to AHJ (Authority Having Jurisdiction) plan review. Any design change needed after AHJ approval will be billed at an hourly rate or as agreed.
